

NPS MedicineWise provides a range of health professional education programs relating to health conditions commonly managed in primary care. Independent and evidence-based, program activities and resources are designed to inform decisions about medicines and medical tests and to improve patient outcomes. All activities are free of charge and most are CPD-accredited. To find out more click on the [titles](#) below.

Activities for individual GPs		<p>Educational visits</p> <p>30-minute facilitated in-practice discussion tailored to GPs' learning needs. Different therapeutic approaches and the choices available are discussed one-on-one with an independent NPS MedicineWise Educational Visitor. Also available as virtual visits via video call.</p>
		<p>PBS/MBS Practice Reviews</p> <p>Provide individual GPs with data on dispensing of PBS medicines they prescribe or MBS tests they order in a specific clinical area to support quality improvement. Distributed by mail or email.</p>
Activities for whole of practice teams	 <p>MedicineInsight</p>	<p>MedicineInsight visits</p> <p>Practices and GPs participating in the MedicineInsight program are offered facilitated visits with an NPS MedicineWise Educational Visitor. Individualised data reports allow GPs to compare their own patterns of prescribing and patient care with national benchmarks and their peers. This data can help inform customised quality improvement activities that align with key areas identified for improvement.</p>
		<p>Small group meetings</p> <p>1-hour facilitated group meeting for up to 10 primary care providers – GPs, pharmacists and nurses – from one practice. Evidence and guidelines are enhanced with aggregate prescribing and practice data from MedicineInsight to align with best practice and identify key areas for improvement.</p>
Activities for all health professionals		<p>Webinars</p> <p>Each topic features a multidisciplinary panel of experts discussing the latest evidence and therapeutic options. Available live, and as on-demand recordings.</p>
		<p>Clinical case studies</p> <p>Participants compare their management of a hypothetical clinical scenario with that of peers. Immediate feedback and clinical expert commentary are provided to challenge thinking and improve patient care.</p>
	 <p>Good Medicine Better Health</p>	<p>Good Medicine Better Health modules</p> <p>CPD-accredited education activities for Aboriginal and Torres Strait Islander health workers and practitioners.</p>
		<p>Online courses</p> <p>Informing quality decision-making in the use of medicines and medical tests. Engaging modules allow health professionals and students to work at their own pace.</p>
		<p>National Prescribing Curriculum</p> <p>Interactive case-based modules cover a range of conditions. Designed to encourage confident and rational prescribing, the modules are valuable learning tools for Australian medical and pharmacy students.</p>

Australian Prescriber

Independent peer-reviewed journal providing critical commentary on drugs and therapeutics for health professionals.

Fortnightly [podcasts](#) provide a quick dive into some of the many articles.

NPS MedicineWise podcast

A regular podcast from NPS MedicineWise to help health professionals stay up to date with the latest evidence for medicines, tests and treatments.

RADAR

Timely, independent evidence-based information for health professionals on new drugs and medical tests, and changes to PBS and MBS listings.

Medicinewise News

Pragmatic and clinically focused articles written to support our education programs.

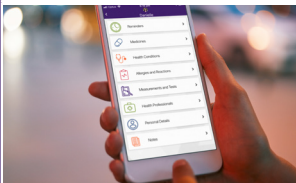

Quality improvement hub

Practical information, tools and resources for health professionals and staff in general practice to help improve the quality of health care and safety for patients.

Patient resources

Use these with patients to enhance communication, decision-making and disease management – available online and through some clinical software platforms.

MedicineWise app

Keep track of medicines and access important health information on a smartphone any time and anywhere, especially in emergencies.

Choosing Wisely Australia

Provides 5 questions to guide better conversations between consumers and healthcare providers about recommended tests, treatments and procedures.

Medicines Line and AME Line

Telephone services where consumers can speak with an NPS MedicineWise pharmacist.

Medicines Line (1300 633 424) is delivered in collaboration with healthdirect Australia and provides information on prescription, over-the-counter and complementary medicines.

The Adverse Medicine Events or AME Line (1300 134 237) provides consumers with an avenue for reporting and discussing adverse experiences with medicines and vaccines.
